

# Release 19.12

UI enhancements | Codeless

## UI enhancements

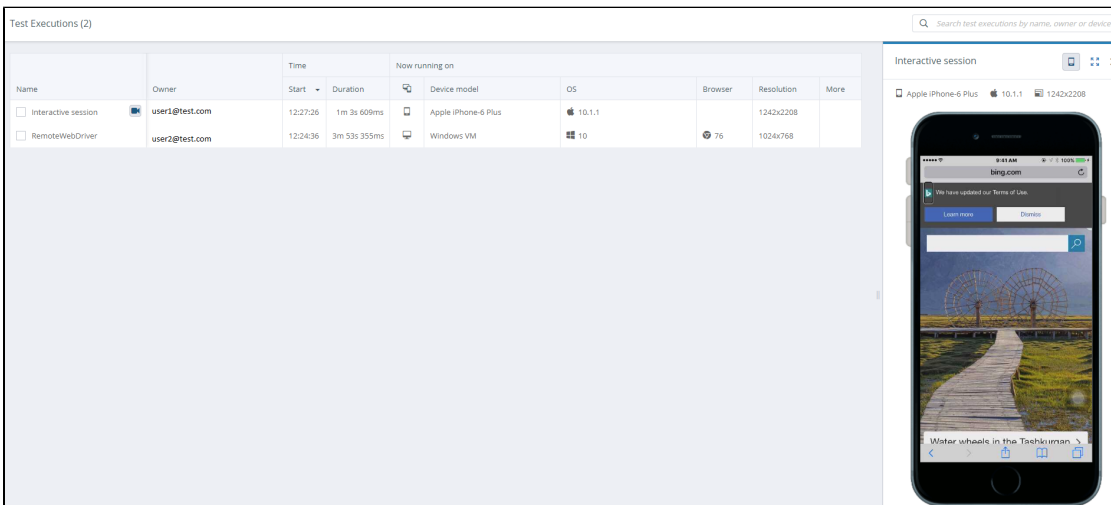

### Base URL for Web Interactive

For web devices, you can now specify a URL to open on startup.

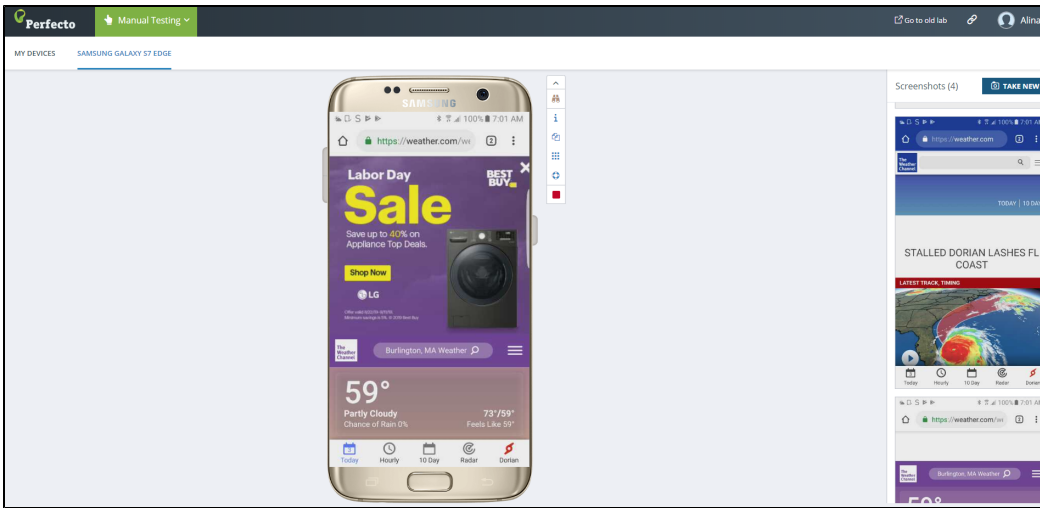

### Live Mobile Streaming in Execution center (New UI) for mobile devices

The Execution Center lets you view ongoing *mobile* test executions in real-time. When an automation or interactive test is in progress, it now appears in the **Test Executions** list. Moving the pointer over an entry in the list displays an icon for video selection (  ).

### Get Screenshot

You can now take a screenshot of the remote web machine or mobile device and save it on your local machine.

## Perfecto Connect

Perfecto Connect is available now in all clouds. In case of issues, contact Perfecto Support.

## Codeless

### Add DNS record

Codeless now includes the option to provide DNS settings. To add a DNS record to your project:

1. Go to **Assets > Environments**.
2. For a new environment, click **Add Environment**. For an existing environment, move your pointer over the entry and select **Edit**.
3. In the dialog box that opens, click **Add DNS Record**, provide the required IP or Host information, and then click **Add**.

### Create an environment ✕

Name

Base Host

IP	Host	
<input type="text"/>	<input type="text"/>	<input type="button" value="Add"/>
