

Module 1 - Introduction to Quantum

Welcome to our course on Quantum, Perfecto's automation framework.

Quantum is designed to give a team everything it needs.

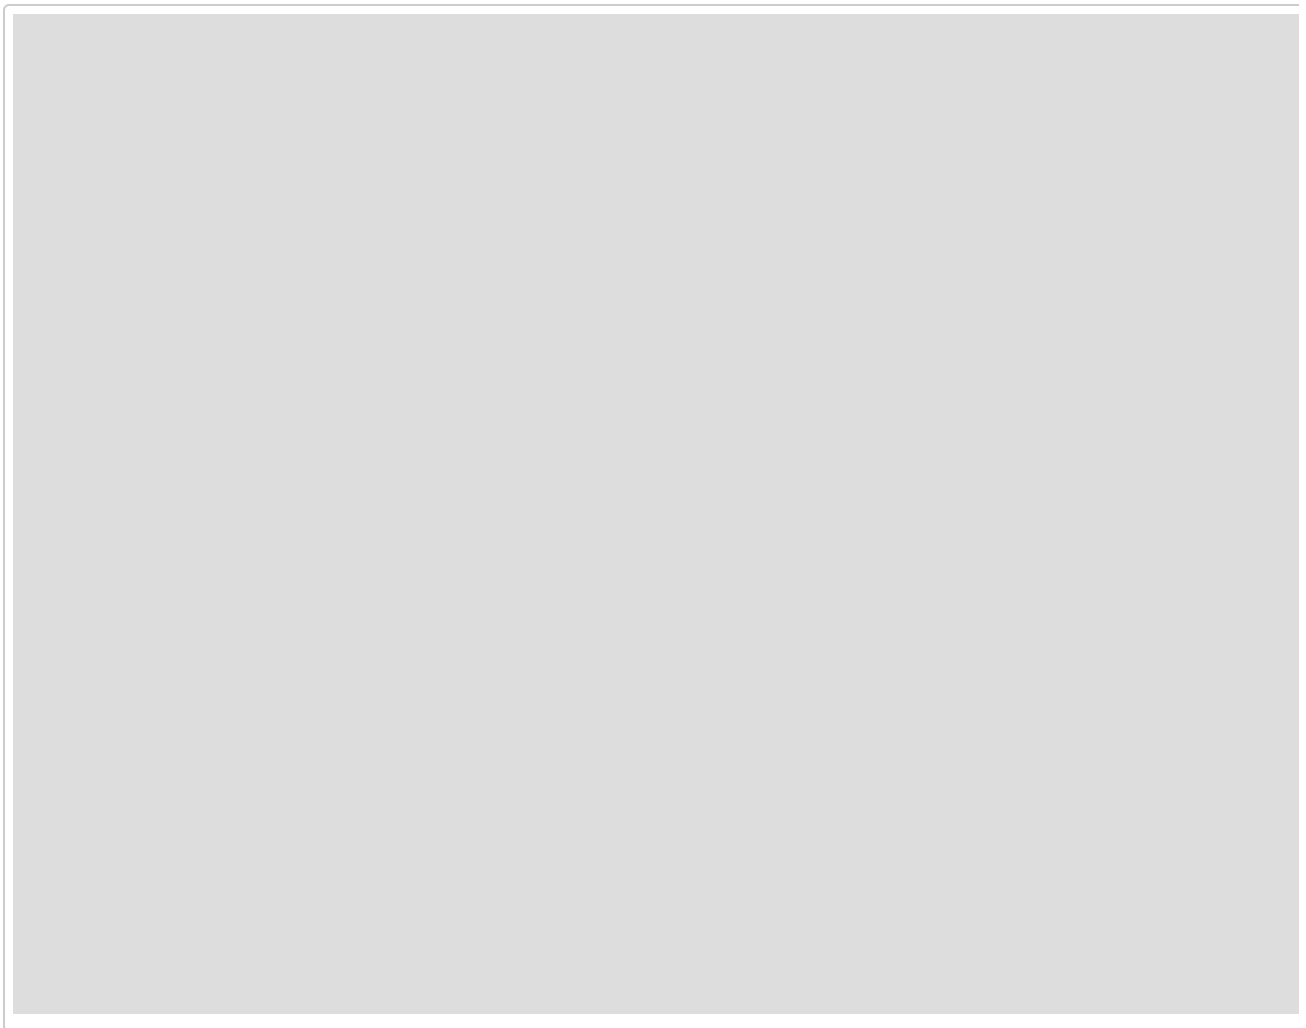

- Easy test creation with BDD steps
- Custom step creation
- Built in execution, reporting, and data modules.
- Ready to go with a simple setup.

In this course we'll cover everything, beginning today with a simple test scenario and ending in advanced features.

We'll learn what Quantum is and the different flavours of Quantum and then look at the BDD (Behaviour driven design layer) and learn how it works
