

Perfecto Mobile Add-in Fails After UFT Upgrade

Problem

Perfecto Mobile Add-in encounters "System.IO.FileLoadException: Could not load file or assembly" error after upgrading UFT to either v14.03 or v14.52:

As detailed at [Legacy | IDE Plugin Installation](#), UFT 14.0 is tested and fully supported.

Solution

To avoid the error indicated, uninstall the Mobile Add-in and then reinstalling it from the command line from your Windows machine as follows:

```
perfectomobile-qtp-installer.exe /F /V 14
```

Note: The installer should be executed from the location where you downloaded the Add-in to.
