

How to remove the 10 devices limit from the Perfecto Dashboard

by Nato Vasilevski

You can remove the 10 devices limit from the Perfecto Dashboard in few easy steps:

Step-by-step guide

1. Go to the dashboard (I have done it in the browser, but it's the same in the IDE)
2. Look at the bottom left corner and Tick "Show application menus"
3. Look at the top right corner and click on "Settings"
4. Change the value you would like to

You are done!
