

# Download the Perfecto Connect client

This section guides you through getting started with Perfecto Connect.

## On this page:

- [Limitations](#)
- [Download the client](#)

## Limitations

Perfecto Connect currently does not support Mac web machines.

## Download the client

The current version of the Perfecto Connect client is 1.0.26. The link to the executable provided in the procedure below always leads you to the latest release.

We recommend that you make the download phase of the Perfecto Connect client part of your continuous integration process to ensure that you always use the latest version. Perfecto does not support backward compatibility for Perfecto Connect. For an integration example, see [Integrate Perfecto Connect with Jenkins](#).

### To download the Perfecto Connect client:

1. To start the download, click the link to the Perfecto Connect client executable that matches your operating system:
  - [MacOS](#)
  - [Windows-64bit](#)
  - [Windows-32bit](#)
  - [Linux](#)
2. Extract the archive to a folder of your choice.
3. To allow activation of the client from any location, add the folder to your Path environment variable.
4. If your network has limited access policies, allow the Perfecto Lab to connect to the service by adding the required connections to your network configuration. For more information, see [Perfecto Connect network requirements](#).
