

Stop a test

On an open device, you can choose to ignore the current test or to end the session. This option also provides a link to the report in the [Report Library](#).

To stop a test:

1. Click the stop icon .
2. In the **End test** form, select how to end the test:
 - **Ignore it:** Select if you don't want to generate a report for this test.
 - **Mark Passed:** Select if you consider the test a success. Then provide a name and, optionally, copy the link to the report.
 - **Mark Failed:** Select if the test didn't pass. Provide a name and, optionally, enter a description of the failure and copy the link to the report.
3. If you want to clean up the device before it is released, select **Clean up device on release**.

Note: If devices are cleaned by default, this checkbox is not available.

4. Select **END AND RELEASE DEVICE** (default). If you are not ready to release the device and only want to end the test, click **END AND START NEW TEST**.
