

Cloud call

Command: gateway

Subcommand: call

Supported Platforms: Native,Selenium,Appium

Supported OS: Android, iOS

Generates an external voice call recording to the selected destination

Description

It is possible to select multiple destinations that may include devices, users, and phone numbers.

At least one destination **must** be selected.

When specifying a device via the *to.device* parameter, verify it has a SIM card, which is required for calling that device.

When specifying a number via the *to.number* parameter, replace the '+' character with %2B in the sent string.

Parameters

* Mandatory parameter

Request & Response

Request

```
https://mycloud.perfectomobile.com/services/executions/john@perfectomobile.com_controller_16-11-09_12_44_59_31771?operation=command&securityToken=<your_token>&command=gateway&subcommand=call&param.to.device=FA53XYJ18894
```

JSON Response

```
