

Manual testing

This section provides information on anything related to the **Manual Testing** view (formerly known as Mobile Interactive), such as device selection and operation, including widgets and productivity features available when working with a device. Up to 3 device sessions can run in parallel.

If you are testing devices that are not publicly accessible, you will want to create a secure tunnel with [Perfecto Connect](#).

In this section:

- [Select a device for manual testing](#)
- [Mobile testing](#)
- [Desktop web testing](#)
- [Take a screenshot](#)
